# Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

### Listing of claims

 (currently amended) A method for sterilizing and producing a fish-paste product by utilizing ozone gas-containing microbubbles comprising the steps of:

adding the ozone gas-containing microbubbles generated in water to raw materials of a fish-paste product;

pestling the raw materials of the fish-paste product after the step of adding the ozone gascontaining microbubbles;

coating [[the]] interfaces of the ozone gas-containing microbubbles with tissues composed of the raw materials of the fish-paste product, the raw materials tissues including proteing and lipidg contained in the fish-paste product, thereby maintaining the longevity of the ozone gas-containing microbubbles thereby creating coating shells composed of said tissues, said shells covering the ozone gas-containing microbubbles; and

giving stimulation to a part of the ozone gas-containing microbubbles thereby rupturing the coating shells of the ozone gas-containing microbubbles while said ozone gas-containing microbubbles are in the fish-paste product, thereby sterilizing the fish-paste product by the formation of active oxygen and free-radical species;

wherein the ozone gas-containing microbubbles have a diameter of 50 µm.

# 2. (cancelled)

3. (original) A method according to Claim 1, wherein the step of adding the ozone gas-containing microbubbles to raw materials of the fish-paste product comprises adding water containing the ozone gas-containing microbubbles.

#### 4. (canceled)

5. (currently amended) A method according to Claim 1, wherein the step of adding the ozone gas-containing microbubbles to raw materials of the fish-paste product comprises spraying a mist of water containing the ozone gas-containing microbubbles.

### 6.- 8. (canceled)

 (currently amended) A method according to Claim 1, wherein the stimulation comprises rubbing together raw materials of the fish-paste products at the [[time]] step of pestling of the raw materials.

#### 10. (canceled)

11. (original) A method according to Claim 1, wherein the stimulation comprises high-frequency irradiation of raw materials of the fish-paste product.

### 12. (canceled)

13. (original) A method according to Claim 1, wherein the stimulation comprises microwave irradiation of raw materials of the fish-paste product.

## 14. (canceled)

15. (original) A method according to Claim 1, wherein the stimulation comprises heating raw materials of the fish-paste product.

#### 16. (canceled)

17. (currently amended) A method according to Claim 1, wherein in the step of giving stimulation to a part of the ozone gas containing microbubbles is repeated further comprising giving a secondary stimulation to a part of the ozone gas-containing microbubbles after

processing and packaging the fish-paste product, thereby further sterilizing the fish-paste product by the further formation of active oxygen and free-radical species.

# 18. (canceled)

19. (previously presented) A method according to Claim 1, wherein the step of giving stimulation to a part of the ozone gas-containing microbubbles does not rupture all of the ozone gas-containing microbubbles.
